

The District shall not permit an individual group or organization to use school facilities as media for advertising or organizations to be sponsored by a corporation, unless the group or organization follows administrative guidelines on corporate sponsorships. The Superintendent may approve the request. The Board shall have authority to give final approval.

This policy shall not be construed to extend to advertising in student publications; provided, however, that to the extent permitted by applicable law, the content of specific advertising in a student publication may be regulated by school administrators.
